

Natura 2000

Document updated: 31.12.2011 rt, English 20.7.2012/ae

Contents

1. Feature Attribute Description	1
2. Additional Information	4
3. UML-model	5

1. Feature Attribute Description

SPA	Special Protected Area, Area protected in accordance to the EU's Birds Directive
SCI	Sites of Community Importance, area protected in accordance to the EU's Nature Directive

The dataset includes following features having same feature attributes

NaturaAhvKohde_ma (Natura area on Åland islands)

NaturaAhvKohde_p (Point shaped Natura sites on Åland islands)

NaturaKohde_ma (Continental Natura areas)

NaturaKohde_r (Line shaped Natura sites on Continental Finland)

Feature Attribute	Description
NaturaTunnus	Natura area Id
Lisatieto	Additional information related to the outline or changes on the site information.
DigPohja	Source data used for digitizing
	perusCD Topographic base map
	ykj97,99,02,03 Topographic base map from a specific year e.g. 97 = 1997
	nkrk97,99,03 Numeric cadastral map from a specific year
	1:20 000,ranta20 Numeric shore database (1: 20 000)
	1:50 000 Digitized using data in scale 1:50 000
MuutosPvm	Date when the information has been modified

NaturaTotTapa_ma, NaturaTotTapa_r

The implementation modality of the Natura area
(ma = polygon Natura areas, r= line Natura areas)

Feature Attribute	Description
NaturaTunnus	Id of the Natura area
TotTapa	Implementation modality
Lisatieto	Additional information related to the outline or changes on the site information.

Status

Description

Id of the Natura area

Name of the Natura area

EU Directive guiding the protection

SCI= Sites of Community Importance, area protected in accordance to the EU's Nature Directive

SPA= Special Protected Area, Area protected in accordance to the EU's Birds Directive

Organization responsible for management of the area

Area codes for protection areas that are partly or fully overlapping.

Information on declaration of the Natura site (vnp = government's resolution)

1998/1 vnp 20.8.1998 site included in the decision

1999/2 vnp 25.3.1999 site included in the decision

2002/2 vnp 8.5.2002 additional site

2002/3 vnp 8.5.2002 new site

2002/4 vnp 8.5.2002 site type has been changed to (spa/sci)

2004/2 vnp 22.1.2004 extended/reduced site

2004/3 vnp 22.1.2004 new site added with resolution resolution

2004/4 vnp 22.1.2004 site type has been changed to (spa/sci)

2005/2 vnp 2.6.2005l extended/reduced site

2005/3 vnp 2.6.2005 new site added with resolution resolution

2005/4 vnp 2.6.2005 site type has been changed to (spa/sci)

2006/3vnp 23.11.2006 site

2006/4 vnp 23.11.2006 site, type has been changed

VnPaatosKunta

Counties listed in the resolution, where protection area is situated

VnPaatosPAla_ha

Site area in ha, as described in Governmental resolution

VnPaatosPituus_m

Length of the area as described in the Governmental resolution (only if the site is a line)

VnPaatosTotTapa

Implementation modality for the Natura-site as in governmental resolution.

VnPaatosLisatieto

additional information when size of the conservation area in spatial dataset differs from the area announced in the governmental resolution

GeomTyyppi

Geometry type

1= polygon

2= line

3 = polygon and line

Outdoor recreation Act

2. Additional Information

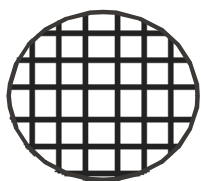

Natura-areas are in general independent areas, but they can also overlap different ways.

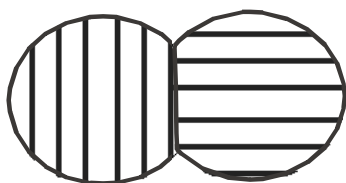

SCI-area, with no connection to other NATURA 2000- areas (one code).

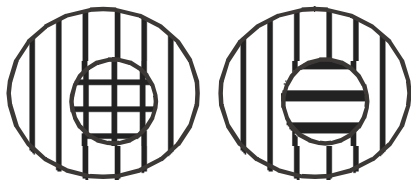

SPA-area, with no connection to other NATURA 2000- areas (one code).

SCI-area merged with a SPA-area (one code).

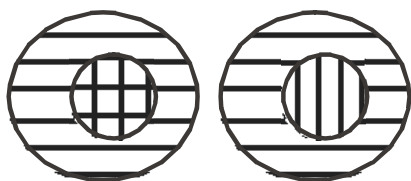

SCI- ja SPA-areas area connected, but are not overlapping (two codes).

SCI-area, including a SPA-area (SPA-area is on top of the SCI-area, two codes).

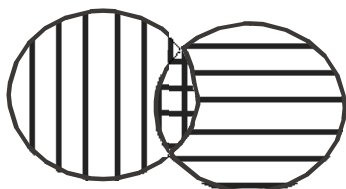

SPA-area is inside the SCI-area (gap in the SCI-area, two codes).

SPA-area including a SCI-area (SCI-area is on top of the SPA-area, two codes).

SCI-area is inside the SPA-area (gap in a SPA-object, two codes).

SCI - ja SPA-areas are partly overlapping (two codes).

3. UML-model
