## 1. Feature attribute description

**Example from the dataset representing 2010 but the same applies to other years too.**

<b>Feature attribute</b>	<b>Description</b>
AsuinALuokka=	Residential area type (1 = high-rise area 2 = low-rise area, 3 = sparsely built low-rise area))
Vaesto90Lkm=	Population in a particular year (1990). Number in the field name represents the year. The same applies to all the population fields in the dataset.
AsHuon90Lkm=	Number of apartments in a particular year (1990). Number in the field name represents the year. The same applies to all the Number of apartment fields in the dataset.
MaaPALa_ha=	Land area in hectares
MuutosPvm=	Date when the data has been modified
AsuinA90Nro=	Residential area identification number in a particular year (1990). Number in the field name represents the year. The same applies to all the identification number fields in the dataset.
Ykr90Nro=	Locality number number in a particular year (vuonna 1990). Number in the field name represents the year. The same applies to all the locality number fields in the dataset.

## 2. Lisätietoja

Syke's open information service delivers the most current version of the dataset as well as the historical data at five year intervals from 1990 onwards including only the land area information. Current version is updated on a yearly basis. For the internal use in environmental administration the data is available at five year intervals from 1990 onwards and on a yearly basis from 2011 onwards and includes all the attribute information.
